

TECHNOLOGY FOR SOVEREIGN NATIONS

ARXIA.COM

CORPORATE DECK 2026

SECTION 02 – WHO WE ARE

We co-build digital infrastructure that nations own.

Arxia is a digital transformation consultancy specializing in Sovereign Technology. We design, build and implement the digital building blocks for countries to own their digital future.

We focus on creating interoperable systems that favor open-source, no-vendor lock, low-code, AI-powered, reusable, accessible, and citizen-centric technologies.

We've worked alongside governments and professionals from more than 15+ countries across Africa, Latin America, Eastern Europe, and Southeast Asia. We foster cooperation, community and capacity building with partners all over the world.

ORGANIZATIONS TRANSFORMED

OUR PRINCIPLE

Sovereignty is co-built, not bought.

Digital sovereignty means a nation controls its own digital infrastructure — the identity systems, data exchange layers, payment rails, and public services that citizens depend on every day.

It means no vendor lock-in. No foreign dependency. No black boxes.

We believe every nation deserves the technical capacity to build, own, and evolve its digital foundations. Our role is to make that possible.

"Partnership without dependency. Ownership without compromise."

SECTION 04 – SOVEREIGN STACK

Proven technologies from the world's most advanced digital nations.

We implement, integrate, and adapt proven technology stacks developed by governments that have already solved the hard problems — made their solutions available as public goods — and adapt them to national realities.

CORE LAYER

Digital Public Infrastructure

DPI is the foundational layer of a digitally sovereign nation — the shared rails on which all government services, private sector innovation, and citizen interactions operate. Without it, digital transformation is just a collection of disconnected projects.

Data Exchange

Secure, standardized data exchange between government institutions. Based on X-Road and equivalent protocols. The nervous system of digital government.

Payments Core

National payment infrastructure enabling government-to-person, person-to-government, and institutional transfers. Interoperable, auditable, sovereign.

Digital Identity (e-ID)

Citizen identity verification and authentication systems. The trust layer. Every service depends on knowing who is on the other side.

SERVICE LAYER

Digital Public Goods

On top of the infrastructure layer, we implement the building blocks of a functional digital government — following a principled approach: open-source, interoperable, reusable, and designed for the citizens who depend on them.

e-Services

Government digital services for citizens and businesses. From permits to certificates — accessible, fast, transparent.

AI Automation & Workflows

Intelligent process automation for government operations. Reducing bureaucratic burden. Accelerating decision cycles.

Government Web Portals

Unified citizen-facing portals. One entry point. Consistent experience. Accessible by design.

Government Applications

Custom applications for specific government needs — registries, case management, licensing, inspections.

e-Procurement

Transparent public procurement systems. Open competition. Auditable processes. Anti-corruption by architecture.

e-Invoicing

Standardized electronic invoicing aligned with international norms. Connecting government, businesses, and tax systems.

KNOWLEDGE LAYER

International Expertise

We bring in international experts from across the globe to provide specialized consultancy services. Our network includes practices practitioners who have designed and implemented national-scale systems — not theorists who have only studied them.

STRATEGY

- Digital Transformation Strategies
- e-Government Strategies
- AI Strategies & Governance

OPERATIONS

- Business Process Modelling & Optimization (BPMN 2.0)
- Change Management
- Systems Auditing

STANDARDS

- Data Governance & Standardization
- Interoperability Frameworks
- Public Procurement & e-Invoicing Strategies

SECTION 05 – INTERNATIONAL PRESENCE

Present across four continents.

Active engagements and partnerships across Latin America, Africa, Europe, and Southeast Asia.

SECTION 06 – PORTFOLIO

Selected Engagements

ROMANIA – 2019-2020

Consultancy for National e-Government Framework

Policy review and process redesign for 36 priority Life Events targeted for full digitalization. Capacity building in BPMN 2.0 and on-the-job coaching for 16 central public institutions, led by Ernst & Young consortium.

E-GOVERNMENT

BPR

CAPACITY BUILDING

ROMANIA – 2023

Inter-institutional Interoperability Framework for Refugee Services

Process redesign and technical implementation of a national interoperability framework to digitalize service delivery for Ukrainian refugees, integrating multiple public institutions under a single platform. Financed by the World Bank.

INTEROPERABILITY

BPR

HUMANITARIAN

ROMANIA – 2016-2022

Digital Public Procurement System

Process redesign and implementation of a digital procurement platform for planning, execution and audit of internal procurement activities across public institutions, financed by the European Union.

E-PROCUREMENT

BPR

EU FUNDED

SENEGAL – 2025 (ONGOING)

Digital Transformation Consultancy – Goin' Digital

Digital framework alignment with Senegal's New Deal Technologique strategy. Covers e-government consultancy, software architecture, e-service remodeling, BPMN 2.0 process modeling with Camunda, and capacity building. Financed by GIZ.

GOVSTACK

E-SERVICES

BPR

12 AFRICAN COUNTRIES – 2024-2025

Regional Technical Standard for Mining Data Interoperability

Technical architecture, data sharing standard and requirements specification for the ICGLR regional mining data sharing platform, enabling interoperability and traceability of mining-related data across 12 member states. Financed by GIZ.

DATA STANDARDS

INTEROPERABILITY

GOVERNANCE

12 AFRICAN COUNTRIES – 2024-2025

Cross-Border Data Sharing Policy and Technical Standard

Development of the data sharing policy for ICGLR and 12 member countries, including a technical standard, semantic data model, and technical transposition for cross-border data governance. Financed by Impact Transform.

DATA GOVERNANCE

POLICY

STANDARDS

RWANDA – 2024 (ONGOING)

Government Web Portal Standardization – GovStack CMS

Consultancy, training and implementation for standardization of government websites using the GovStack CMS Building Block. TYPO3 upgrade, new UX/UI and Web Accessibility guidelines, and reimplementation of key ministry websites. Financed by GIZ.

GOVSTACK

WEB PORTAL

ACCESSIBILITY

RWANDA – 2024

Consent Governance Prototype – GovStack Consent Building Block

Development of Consent Governance and Personal Data Protection Agreements as a national prototype for Rwanda, based on the GovStack Consent Building Block, through a national workshop with IREMOB and RISA. Financed by GIZ.

DATA GOVERNANCE

CONSENT

DPI

RWANDA – 2023

Workflow Platform Selection for G2G Process Digitalization

Identification, benchmarking and selection of a process workflow platform to support Government-to-Government processes digitalization, aligned with GovStack initiative specifications. Beneficiary: RISA. Financed by GIZ.

WORKFLOW

G2G

GOVSTACK

RWANDA – 2024 (ONGOING)

Software Architecture Consultancy – GovStack Acceleration

Frame contract supporting GovStack principles adoption in Rwanda, with focus on the Workflow Building Block for G2G digitalization and the Consent Building Block for national personal data consent governance. Financed by GIZ.

ARCHITECTURE

GOVSTACK

INTEROPERABILITY

RWANDA – 2024-2025

Mining Data Standard & Systems Audit

Development of Rwanda's mining and minerals data sharing standard, technical interoperability model for integration of RMB systems (GIMCS, DMTS), and comprehensive audit of current mining domain systems. Financed by GIZ.

DATA STANDARDS

AUDIT

INTEROPERABILITY

RWANDA – 2019-2020

Software Integration Architecture Coaching for RISA

Capacity building program in Software Integration Architecture for the technical personnel of the Rwanda Information Society Authority, covering modern integration patterns and e-government architecture principles. Delivered jointly with Evolve.

CAPACITY BUILDING

ARCHITECTURE

E-GOVERNMENT

CAMBODIA – 2025

Social Protection DPI Architecture & X-Road Integration

Consultancy for the Digital Social Protection Platform architecture following the GovStack approach, including Pub/Sub implementation integrating X-Road for secure data exchange between national social protection systems. Client: Swiss TPH.

DPI

INTEROPERABILITY

X-ROAD

ETHIOPIA – 2025

Input-Output Coefficient Digital Platform

Consultancy and implementation of a digital platform for Input-Output Coefficient management for tax deduction on import of raw materials, built on the GovStack framework using the Workflow Building Block. Client: Ministry of Industry / GIZ.

GOVSTACK

WORKFLOW

TAX MANAGEMENT

SOMALIA, DJIBOUTI, KENYA, SENEGAL, ETHIOPIA – 2024-2025

GovStack Adoption Training for African Governments

Multi-country training programs for the adoption of the GovStack framework, delivered to government officials and technical teams across five African nations. Financed by GIZ and ITU.

CAPACITY BUILDING

TRAINING

SECTION 07 – WHERE TO START

Where to start?

Let's start by finding the gaps.

Every nation's digital infrastructure is at a different stage. Before building, we need to understand where you are — and plan together where you need to go.

The Arxia Digital Audit

Our Digital Audit maps your current infrastructure, identifies gaps, benchmarks against international standards, and produces an actionable roadmap — not a 200-page report that sits on a shelf.

You'll know exactly where you stand and what it takes to get where you need to go.

PHASE 01

ASSESS

Current state assessment. Infrastructure, governance, capacity.

PHASE 02

MAP

Gap analysis against DPI standards and best practices.

PHASE 03

PLAN

Actionable roadmap with priorities, timelines, and investment needs.

PHASE 04

BUILD

Co-build with your national team. Transfer. Own.

Start your Digital Audit →

SECTION 08 – CONTACT

Let's build together.
